

beach, in the board room at the Bank. He knew them to be perfectly safe types, who would never really do anything for the working class.

Thus Europe stewed in degeneracy and cynicism. The old European Society deserved to die in the holocaust of World War II, in the gas chambers of Auschwitz. It was morally bankrupt, far gone beyond any possible hope of redemption. Its rich men were very rich, though. They were rich beyond the wildest dreams of any American millionaire. The American tycoon considers himself wealthy if he holds a certain number of millions in money and assets. The European tycoons controlled the currency systems of a whole system of nations and colonies around the world. We could not say that they "owned" a certain amount of money. THEY HAD THE POWER AT ANY TIME TO CREATE AS MUCH MONEY AS THEY WANTED. They held an unlimited requisition on the physical resources of more than half the world. And still their greed was not satisfied.

It was their insatiable greed which brought the beginning of the end for them. They conceived the idea of taking over Russia as their private estate. This is what the "October Revolution" in Russia was really about. How much is Russia worth? How much is it worth to have the labor of 180,000,000 people at your disposal? What is the value of a piece of land stretching from the Baltic to the Pacific, from the Arctic to the latitude of Samarkand? The grab for Russia was the biggest single economic operation in all history. The European and New York tycoons who attempted it were nearly all Jewish. They moved into Russia behind a smoke screen of pseudo-idealism, proclaimed themselves the saviours of the oppressed masses, and proceeded to take over. The wealth they were attempting to grab staggers the imagination. It was worth more than a thousand Henry Fords, a couple of hundred DuPonts, two dozen J. P. Morgans and even a few hundred present-day Texas oil millionaires combined.

With the natural wealth of Russia, and with its vast labor supply under their direction, they could have bought control of the world. Money? They could have printed as much as they pleased, all backed solidly by vast gold mines, oil fields, agricultural land. Bear in mind that this vast grab for Russia was cooked up by a mere handful of cold, cruel, cynical men meeting in the board rooms of banks in Europe and New York.

One man, and one man only, prevented this grab from being successful. That man was Josef Stalin. Stalin was a match in cruelty and cynicism for the men who met in the board rooms of the banks. Moreover, he understood the whole racket. He was taught at various stages of his career, by experts on Judaism and Jewish intellectual rackets. It has been pretty well established that Stalin was never a Communist but was a police stool pigeon for the old Czarist Secret Police. He joined the C.P. only to spy on it, as FBI agents do in the U.S.A. today. He was arrested now and then to keep up appearances. When the Communists finally came to power, he was not fool enough to believe in their ideology. He knew that Lenin was a German agent,

a traitor and a spy. He knew that Leon Trotsky was an agent for the Jewish bankers. He understood the whole smash-and-grab racket which was being worked against Russia. Was Stalin a hero or a villain? It is childish to ask such a question. In his own country, he was a Nationalist and a patriot. To OUR country he was an enemy. Old Henry Ford I was the only American whom he ever really respected. Stalin was for Russia, first, last and always. He mortally hated the whole pack of Marxists. Yet he had to use them, to play his game concealed within theirs. He shot as many of them as he dared. He would have liked to shoot the whole lot, but he had to stay in power and run the country. He transformed Marxism utterly. It was no longer in the hands of the International Bankers. It was in Stalin's hands now. This was no longer the phoney "revolution" which was a tool of the bankers. This was MOSCOW: THE THIRD ROME. Those who want to know the real facts should try to get a book published in London in 1937: **MOSCOW: THE THIRD ROME** by Professor N. Zernov.

The Jewish reaction to Stalin was frantic. Here was a Goy smart enough to see through their schemes and, moreover, to defeat them. It is quite likely that the Jews eventually succeeded in murdering Stalin in his old age, just as he was getting ready to work a "final solution" of the Jewish problem in Russia. It is doubtful if the Jews have succeeded in destroying Stalinism. Stalin built a new Russian educated class which has strong vested interests of its own, which it will defend against its Jewish rivals.

A little later, Hitler arrived on the scene. Hitler did not represent a coherent political plan at all. He represented the blind, black rage of the cheated European masses. The Germans were the brightest and sharpest of the Europeans, and the first to see through the Jewish intellectual rackets which enslaved them. It was impossible for Germans and Jews to live together, and still is, for that matter.

Today the European workers have prosperity. They have better wages and a higher living standard than ever before. Why? Some people say that the capitalists give this out of fear of Communism. But it is not really Communism which they fear. They have always gotten along well with the Marxists, all of them except Stalin. What they really fear is that mad little man who used to rave and rant in the Sportsplatz in Berlin. Hitler is dead, but take away the good standard of living which the Europeans now enjoy, and you will quickly have another mad little man raving and ranting. The workers of Europe, under Marxist domination, lived for a hundred years on false and empty promises; today they want cash on the barrelhead, and no promises will be accepted. Hitler's voice was the voice of the "little man" in Europe.

Hitler was himself a little man, a man of no great distinction or intellect. It is fear of a revival of Hitlerism which brings a little justice and comfort to the European worker today.

In short, time has run out on the "Social Control Mechanism" of Marxism. It no longer is able to dominate the thinking of the masses. It is obsolete.

American Jews are rapidly making U.S. culture into a museum of Jewish intellectual antiques. One has only to see what they have done to our literature. There are no Gentile writers of any worth today. A Gentile writer simply cannot do business with the Jewish publishing monopoly. He has no common ground on which he can even talk to them. We have a Jewish literature. Only a few older Gentile writers survive. These were already firmly established before the big Jewish take-over of the 1930's. No new young Gentile writers are allowed on the scene, and there has not been one in twenty years. (Those Gentile names you see in the bookstore are predominantly Jewish name-changers.) We Gentiles think well of Taylor Caldwell, for example, but she was established a long time ago. Today, she would never make the grade. Some Jew, of the lowest kind of them who always infest the publishing business, would say, "Sorry, Miss Caldwell, there just isn't a market for this kind of thing today." (Taylor Caldwell's books outsell those of any other living author.)

The Jews who dominate the book trade have given us a mediocre, foul, false, rotten literature. It ought to be boycotted by Gentiles. IN FACT, IT IS BOYCOTTED BY MOST GENTILES. Twelve percent of the people buy eighty percent of the books published by the Jew book racket in New York. This leaves eighty-eight percent of the American people who never buy the product of Jewish publishing. The book industry is a cheap, dirty little industry far over on the sidelines of society. We often hear publicity puffs about how well it is doing. In fact, a lot of school textbooks are being sold. The rest of the book trade, especially fiction, is sinking into oblivion. More fiction books were sold in 1910 than in 1965. In 1910 there was a bookstore in every small town. Today there are only 800 real bookstores left in the U.S.A. The American public, by and large, boycotts the Jewish literature. This may be exactly what the Jews want. Why should Gentiles be literate? The Jews are going to run the world, and have a monopoly on literary culture. Why teach the Gentiles to read at all?

The Jewish Cultural Monopoly, moved to America since it was kicked out of Europe by Hitler, has produced nothing new. It still produces the same cheap, dirty cynicism with which it plied Europe for a hundred years, the same false social philosophies, the same Freudian-Marxian charlantry. Quite clearly the modern Jew has reached the end of the line. He can produce nothing new. And we are fed up with his old product. The right thing for Jews to do today is to SHUT UP, since they obviously have nothing new to say. The old litany of Freud and Marx led them to their Auschwitz. Will history repeat itself?

Common Sense.
